

## Reduce, Reuse (Donation) and Other Recycling Opportunities (Know where to throw)

Remember, it's REDUCE, REUSE and then RECYCLE. Reducing the amount of waste we create in the first place will help reduce the amount of materials that need disposal. Many items that you no longer need may still be useable.

Have usable stuff you don't want anymore? Don't throw it out! There are nonprofit organizations in Arizona that can make good use of your stuff. Let us help you find them along with other Recycling Resources.
