Design Review Less Than 5 Acres

- Design Review consists of both preliminary and final approvals:
 - Preliminary approval is for all the land area of a project and for issues such as site access, general building and parking locations, landscape and grading concepts, and architectural guidelines for multi-building projects.;
 - Final approval may be for an entire project or one part of a project. Final Design Review establishes the details of the site, architecture, landscaping, grading and drainage, and enables a project to proceed to the construction phase.
- Pre-Application reviews are optional for minor final design review less than five (5) acres within an approved preliminary plan.
- Some Design Review projects may require a Public Hearing Notification and Public Hearing Meeting
